**New-build Black Shiver 120 with 3 x 400hp Mercury Verado Racing engines.**

Black Shiver line is the flagship of Novamarine manufacturing: a complex product dedicated to whoever is looking for the best of technology, design and functionality. The numbers and performance reach competition levels, the powerful engines and hydrojets Kamewa – Rolls Royce push it to over 50 knots, the hull is designed to cruise at its top performance under all conditions, and the shallow draft allows you to get into shoal waters thus allowing an incomparable connection with the sea.

Last uniqueness, but not least in order of importance, the tubes used for the 220 and the entire Black Shiver line use a special shock-resistant rubber foam that is resistant to punctures and does not deflate thus offering greater safety and stability and allowing a larger interior space because of its semicircular shape. Everything is controlled from a console which is the quintessence of technology. All Black Shiver models are fully customizable.

The Black Shiver 120 is a boat with a sporty and stream-lined profile, designed for those who love speed without sacrificing elegance.

Made with high quality materials such as teak, steel, kevlar and carbon, the 120 is fully customizable and offers the most demanding boat owner all options to be "tailored made".

There are two engine options available, inboard or outboard with power up to 1200 Hp capable of achieving thrilling speeds!
